

## Routledge History of World Philosophies

Since the publication of the first volumes in 1993, the prestigious *Routledge History of Philosophy*, edited by G.H.R. Parkinson and S.G. Shanker, has established itself as the most comprehensive chronological survey of Western philosophy available. It discusses all the most important philosophical movements from the sixth century B.C. up to the present day. All the major figures in Western philosophy are covered in detail in these volumes. These philosophers are clearly situated within the cultural and scientific context of this time.

Within the main corpus of the *Routledge History of Philosophy*, the Jewish and Islamic traditions are discussed in the context of Western philosophy, with which they are inextricably linked. *The History of Islamic Philosophy* and *The History of Jewish Philosophy* are designed to supplement the core volumes by dealing specifically with these two philosophical traditions; they provide extensive analysis of all the most significant thinkers and concepts. In keeping with the rest of the series, each additional volume has a comprehensive index and bibliography, and includes chapters by some of the most influential scholars in the field. They will form the first volumes of a new series, Routledge History of World Philosophies.
